

UCHS Senior Spotlight

Mason Cappelletty

**Plans After Graduation:
Attend Elon University
and study Biochemistry**

My favorite UCHS memory is when I had AP Calculus and struggled with grasping the concepts, and when there came a problem with the final exam and I had to retake it, Mrs. Davis took time out of her personal time to work with me and prepare me for the retake, to which I am eternally grateful for.

I am most grateful for the commitment and dedication the staff puts towards helping us reach our goals and become prepared for the next phase in our lives.

My favorite hobby would most likely have to be photography and video editing & design.

Stay strong, believe in yourself, and always know that the people at UCHS will be by your side no matter where you go in life.
